

LINCOLN MEDICAL CENTER - INTERNAL MEDICINE PROGRAM
DELINEATION OF CLINICAL COMPETENCIES

Resident's Name: Dr. Jane Doe

Resident Level I

Contract Year: July 1, 2021 to June 30, 2022

You are permitted to perform medical histories and physical examinations and to record such in patient medical record. Diagnosis, treatment plans, progress notes and doctor's orders may be recorded in patient medical record. All of the above are performed under the general supervision of an attending physician.

You will be provided a list of procedures in which you are expected to acquire skills during your residency training.

These procedures must be performed under the direct visual supervision of a physician privileged to do the procedure until you are certified as clinically competent to perform them under general supervision. You will document a procedure note which will be signed by the supervising attending physician subsequently. Failure to adhere to these regulations will result in appropriate disciplinary action that may include dismissal from the residency program.

In Emergency situations, a resident physician may perform any life sustaining procedure. This must be documented in the patient's medical record and the attending physician of record must be notified immediately after the emergency.
